Crypton Care and Cleaning Guide

Crypton Fabrics provides upholstery protection without a slick or stiff top coat. Crypton is not a topical treatment. It is a permanent application, chemically bonded to the fabric during the manufacturing process. Cleaning tough stains is a breeze, and Crypton has staying power- for the life of your furniture.

Crypton alleviates the need to use active solvents or other harsh cleaning solutions. Ballpoint pen or permanent marker can be dry erased. Tough food stains like ketchup and yellow mustard can be easily removed. Topical antiseptics, lotions and creams that would stain conventional urethane upholstery forever are wiped away. Regular cleanings and the removal of difficult stains will not damage nor diminish Crypton's finish, performance or high-style appeal.

Day-to-Day Cleaning: Remove ordinary dirt and smudges with mild soap and water. A 5:1 ratio of water to bleach solution may be used as a disinfectant. Rinse the surface with clean water after disinfecting. Dry with a soft, lint-free cloth or towel. The use of conditioners or protectants is not required, nor recommended, for use on Crypton upholstery- its cleanability is permanent and won't wear out.

Stain Removal: Crypton Upholstery is resistant to most common stains. To keep your furniture looking new, stains such as ballpoint pen or permanent marker can be dry-erased with a clean, lint-free cloth. Gently rub the area until the stain has been removed. Wet or gooey stains such as food stains (e.g., ketchup or yellow mustard) topical stains (e.g., antiseptics, lotion and cream) should first be wiped off with a clean cloth or sponge, then follow the instructions above.

Stubborn Stains: If a ghost stain remains, apply a small amount of household rubbing alcohol (isopropyl alcohol) to a clean, lint-free cloth and rub the stain until it has been removed. Rinse with a clean, damp cloth and go!
