

Opti Clean™ is a performance system encasing every fiber to ensure cleanability, providing a two-level stain protection. At the first level, spills are repelled and prevented from entering the fabric so stains are easily removed. Should stains penetrate the fabric's surface or go unnoticed, the second barrier with a releasing property prevents most stains from becoming permanent.

Infinesse® branded performance fabrics are made of nylon fibers, which are inherently stain and fade resistant, and antimicrobial. Spills bead up on the surface of the fabric and allow time for clean up before they set in. It is pet-friendly and does not absorb smells, soft to the touch, and has a heavy duty wear story. Infinesse is eco friendly and Oeko-Tex certified.

Stain Resistant

Family Friendly

Easy to Clean

Soft to the Touch

*To clean, simply blot the spill with a white cotton cloth or paper towel and the stain should disappear. For a more residual stain use mild soap and water, and work in a circular motion starting from the outside of the stain moving towards the center.*
